Attn: Will Walsh

**Subject: NGA CW Replacement**

I wanted to express our sincere appreciation for the excellent job you and your company did in working with us to complete the curtain wall project at the National Gallery of Art in Washington DC.

This project was unique in that no one had ever built a temporary weatherproof enclosure around the four exterior openings of the galleries East Building while artwork remained in place. Working with your firm, we were able to design and build a solid, weatherproof enclosure that enabled the curtain wall sub to safely remove and replace the glass and glazing systems at the main entrances to the building.

During the 6 months our enclosure was in place, no leaks or weather related damage occurred. This was possible only with your guidance and willingness to work with us and the owner to satisfy everyone's concerns.

ACME Panel Company came thru big time for us, and we appreciate your efforts on our behalf. We hope to work with your firm in the near future.

Thanks again !!!

Sincerely yours,

Charles M. Sanata, President
